

BUILDING 3

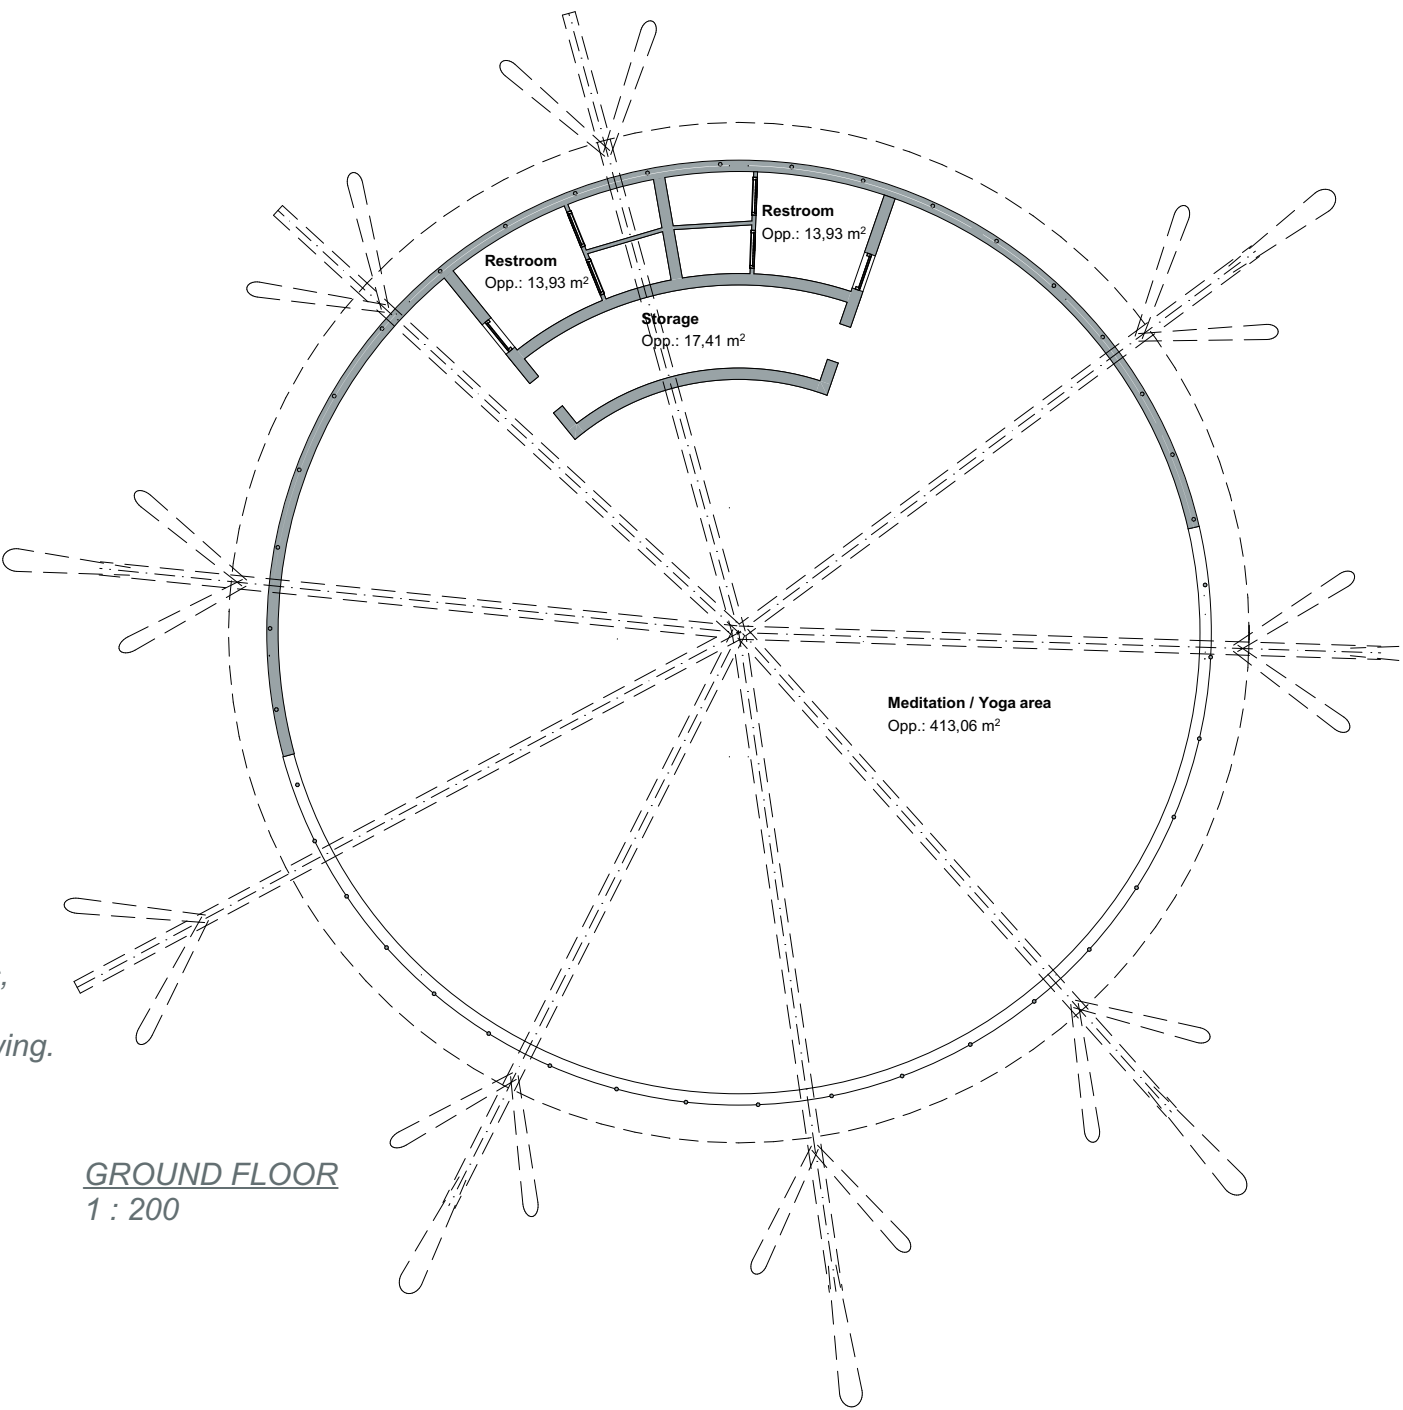

AXONOMETRY

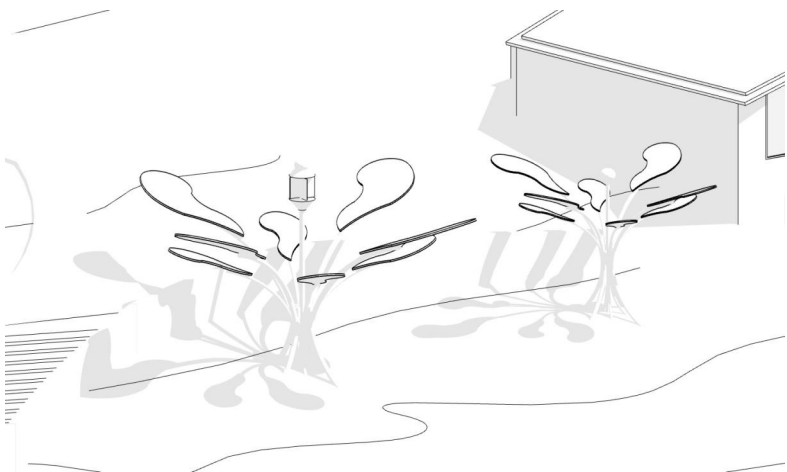

MINDFULNESS AREA

Feel the arm welcome of nature to sink in peace and be in the moment. Safe and warm, hugged by organic shapes and materials. A giant glass treehouse, protect you from the elements while enjoying it all through a panoramic view.

Feel free to express yourself through sound, mindfulness, yoga, meditation or movement. Be strong and sturdy like a tree. Move with the seasons of life and never stop growing.

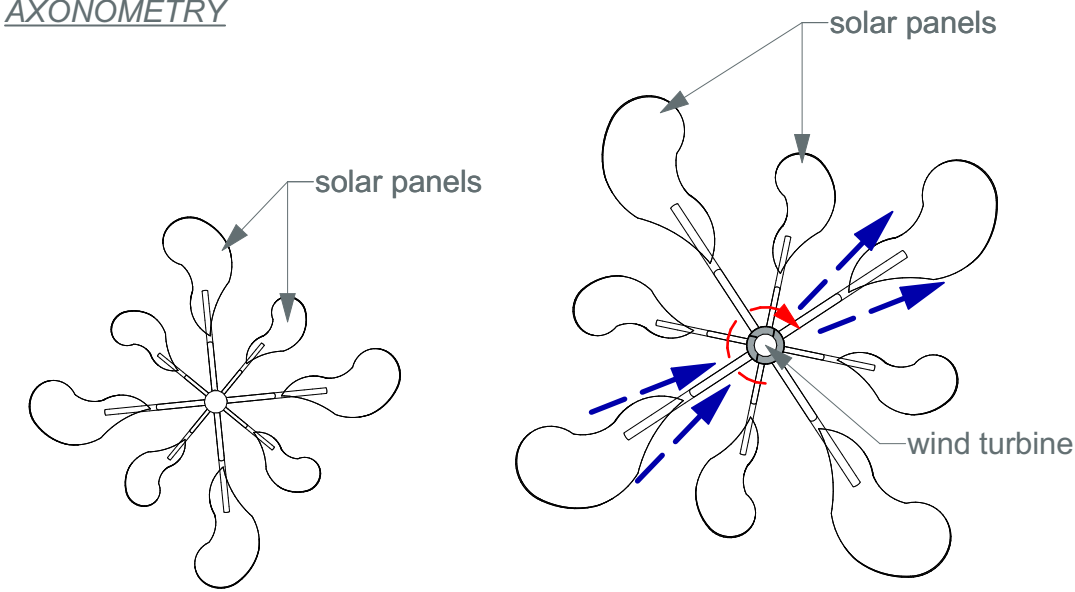

SOLAR TREE

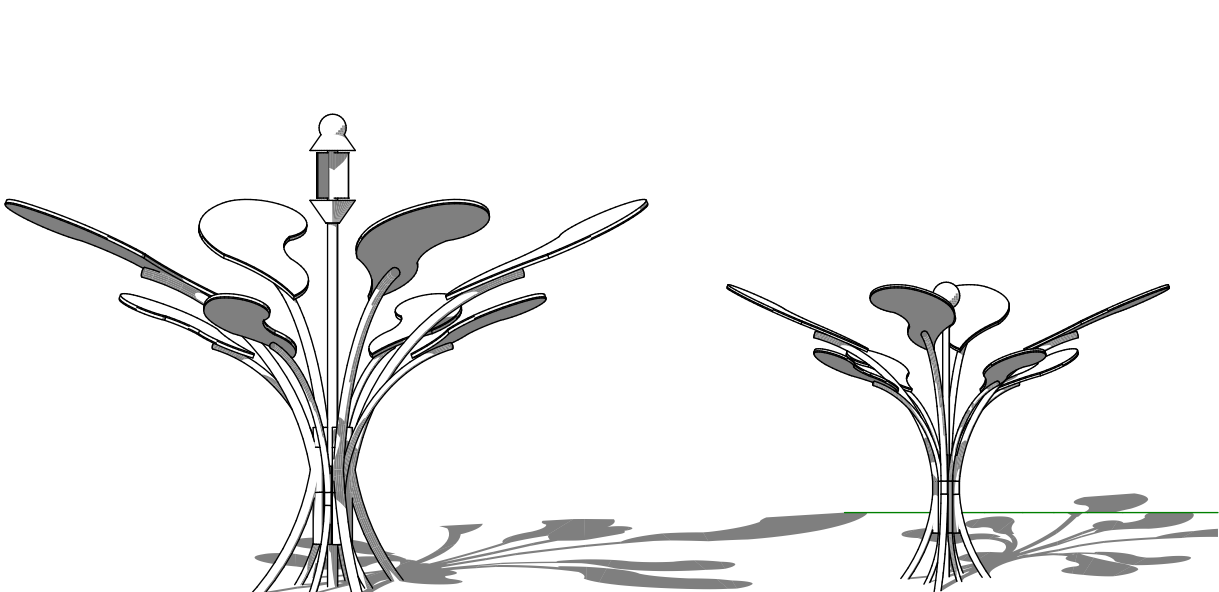

AXONOMETRY

SOLAR TREE
What better way to protect and help nature, than by using nature without invading.
In addition to this design and completely in line with the overall thoughts of being inspired by nature, these solar trees use power from the sun and wind to generate energy. The energy is used into the buildings for electricity, heating and cooling.

SMALL SOLAR TREE
1 : 200

BIG SOLAR TREE
