

The Loop Cabin:

This bike stop is for route that does not have lodging day away. It provides lodging for 4 people, complete with living room, kitchenette, dining table, shower, and compostable toilet. Lights and outlet are run by solar panels. Cooling is done passively, and the cabin is closed during the winter time. It is very low maintenance with just the toilet needing to be empty once a week.

Living Room, Kitchenette, Dining & Bedroom

Passive Cooling

Passive cooling is vital for this cabin because it is for 3 seasons: Spring, Summer & Fall. To save energy, there is no air conditioning but with the windows situated at the right area, the cabin remains cool.
